

STP Integrated Care Decision Making Hubs

Steering Group

Thursday 26th January 2016

Our population

What does integrated care mean for me?

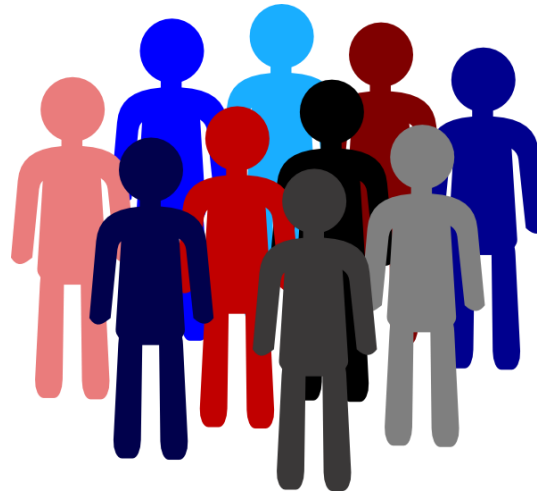

I can plan my care with people who work together

They understand me and my carer(s) and allow me control

I am supported to understand my choices and to set and achieve my goals

I can plan ahead and stay in control in emergencies

I am listened to about what works for me, in my life

They bring services together to achieve the outcomes important to me

I know in advance where I am going, what I will be provided with, and who will be my main point of professional contact.

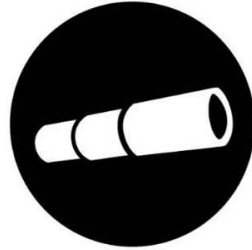

I have the information, and support to use it, that I need to make decisions and choices about my care and support.

Thinking Locally, Working Together

STP Integrated Care Model Principles

STP Integrated Care Model

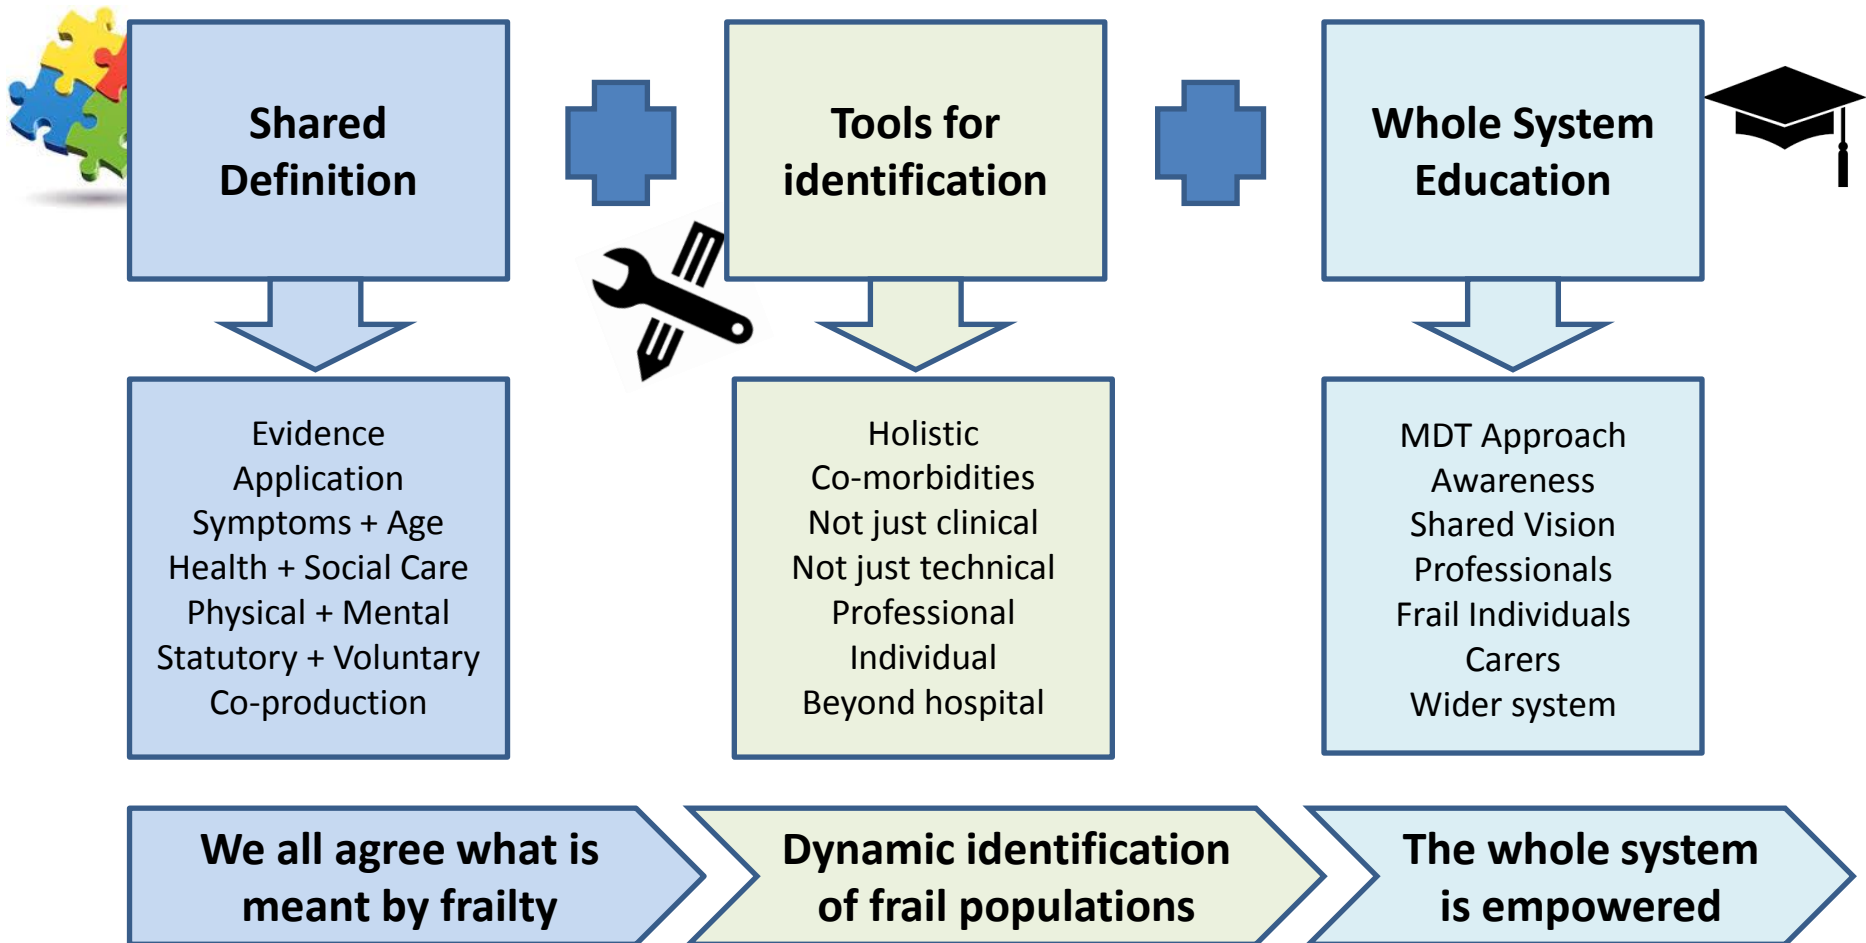

Vision

- *to provide single points of access to services*
- *community based multi-disciplinary models of care*
- *proactive planning and coordination of care*
- *active identification of individuals who are frail or at risk of becoming frail*
- *Preventing frailty*

Frailty – what do we mean?

Agreeing a frailty model across the system through the following process:

So.....

- What does frality mean to you?
- How can we best define frality?

Thank you!
