The challenge ahead

- Our demographics – rising life expectancy, more older people
- Long term conditions – more people living with a long term condition into old age
- Growing demands/expectations:
 - 7 day working /instant access
 - New treatments/drugs
- Tight budgets – overall seen as healthy, wealthy population

Rising to the challenge

- Better Care Fund – working with local authorities to pool budgets and integrate services
- Supporting self-care so patients more confident and can avoid crises
- Investing in community based services so more happens out of hospital
- System Resilience Groups established for each ‘health system’

Working with voluntary sector

- Opportunities to work differently
- Understanding local health and social needs
- Understanding what support voluntary organisations needs – responding to tenders
- How to integrate voluntary, NHS and social care
- Learning from Local Authorities' experience
